Online Car Finders, LLC Inspection Procedures

Online Car Finders, LLC is located in southern Georgia. We are a licensed dealer, not a broker. Our customers are from all over the United States. They give us specifications on the vehicle that they are interested in purchasing like make, model, year, color, and miles. Online Car Finders will then take this information and locate the vehicle through the world's largest auction circuits. These are dealer only auctions selling 150,000+ vehicles each week.

This is where dealers sell and buy cars and where manufactures sell their vehicles. There are many reasons to buy a vehicle from Online Car Finders. We think that our inspection procedures are the best in the business. Listed below are just some of our inspections that we perform on all vehicles that we look at for you.

Vehicle Identification Number Or VIN Check- This will tell us the history of the vehicle that we are researching for you. Here is where we insure that the vehicle doesn't have a salvage, rebuilt, flood, or wreck title. We also check the VIN through the manufacturer to make sure all recalls are done and to see what warranty work was preformed on this vehicle. This check will also tell us if it is a factory buy back under the Lemon Law. We can also tell if this was a daily rental car with one of the national companies. A lot of these companies do not get the extended power train warranty as this makes the vehicle cheaper for them to buy. We check the VIN through the National Flood Data Base to make sure it is not a flood or natural disaster vehicle.

Outside and Inside Inspection --This is done by one of our experts that works with us at each of these auctions. They will do a complete outside and inside inspection of the vehicle. If the car has been wrecked or any paint work has been done they will find it. If the car has been smoked in, they will pass on it.

Final Post Sale Inspection and Safety Inspection -- These inspections are completed by a **Certified Mechanic** at the auction. This is when the vehicle is road tested and put on a lift so that the under side can be inspected and checked for any leaks or problems.

Online Car Finders, LLC

This inspection is also where the auction certifies that the vehicle does not have any frame damage. **The sale is not final until it passes these inspections.**

Inspection During Full Detail --This is a very important part of our customer service process. Each vehicle we sell is fully detailed and inspected.

We feel that our detail/inspection procedure is the best in the business. Our reputation is based on your willingness to recommend and buy from us in the future.
